AMENDMENT "D"

GROUP 3600

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Official Action of July 16, 2001, a response being due with a three month extension of time by January 16, 2002, please consider the following remarks:

REMARKS

Upon consideration of the following remarks, original Claims 17 - 22 remain in this case. Reconsideration of the rejections, in light of the present remarks, is respectfully requested. The present remarks are intended to distinguish the present invention from the prior art Rhodes patent.

In the Official Action, it was indicated that Claims 17 - 22 were rejected as being obvious over the Rhodes '819 patent.

As an overview to the present reply, Applicant notes that this application has been extensively examined. In particular, the Rhodes patent is the fifth different document that has been cited by the Examiner's in the rejection of the present application. Applicant respectfully disagrees with the Examiner's analysis relative to the rejection of independent Claims 17 and 20 based upon the Rhodes patent. Applicant respectfully contends that the Rhodes patent is simply cumulative relative to the other prior art patents cited against the present invention.
